

Key Learning: To use rounding to estimate calculations

Rounding to estimate

Which calculation would you choose to estimate and why?

Will the actual result be more or less than the estimate?

$$64\,038 + 51\,182 \approx$$

$$60\,000 + 50\,000$$

$$65\,000 + 50\,000$$

$$64\,000 + 51\,000$$

$$100\,000 + 100\,000$$

$$581\,823 + 233\,872 \approx$$

$$582\,000 + 234\,000$$

$$600\,000 + 200\,000$$

$$580\,000 + 230\,000$$

$$550\,000 + 250\,000$$

$$58\,943 - 12\,875 \approx$$

$$59\,000 - 13\,000$$

$$60\,000 - 13\,000$$

$$60\,000 - 10\,000$$

$$58\,900 - 12\,900$$

$$154\,728 - 82\,839 \approx$$

$$154\,700 - 82\,800$$

$$155\,000 - 83\,000$$

$$150\,000 - 80\,000$$

$$160\,000 - 80\,000$$
