

Name _____

WORD PROBLEMS:

Making 10 to Subtract

Directions: Make a 10 to solve. Write an equation for the word problem.

1. There are 14 birds in a tree. 8 of the birds fly away. How many birds are left in the tree?

$$\underline{14} - \underline{8} = \underline{\quad}$$

There are _____ birds left in the tree.

2. There are 17 frogs in a pond. 8 frogs hop away. How many frogs are in the pond now?

$$\underline{17} - \underline{8} = \underline{\quad}$$

There are _____ frogs in the pond.

Name _____

WORD PROBLEMS:

Making 10 to Subtract

Directions: Make a 10 to solve. Write an equation for the word problem.

1. There are 13 slices of pizza on the table. Bob eats 6 slices. How many slices are left?

$$\underline{13} \bigcirc \underline{6} = \underline{\quad}$$

There are _____ slices of pizza left on the table.

2. 16 soccer balls are in a bag. Pam kicks 7 balls out of the bag. How many balls are left in the bag?

$$\underline{16} \bigcirc \underline{7} = \underline{\quad}$$

There are _____ soccer balls left in the bag.
