

Where are the rain forests?

Name

Date

The black areas on the map show where the world's rain forests grow.

The tropical rain forests grow between the Tropics of Cancer and Capricorn. The temperate rain forests grow north and south of the tropics, where the rainfall is just as high but the temperature is lower.

Using an atlas to help you, find the places listed:

Name the continents on the map.

AFRICA
ASIA
NORTH AMERICA
AUSTRALASIA
EUROPE
SOUTH AMERICA

Write the numbers of the following countries in the correct circles.

- | | |
|-----------|----------------|
| 1. Borneo | 6. Madagascar |
| 2. Brazil | 7. Mexico |
| 3. Chile | 8. New Zealand |
| 4. China | 9. Sumatra |
| 5. India | 10. Tasmania |
