

Rainforest Plants

Read the ‘Rainforest Plants’ screenshots from the ‘Britannica Kids – Rainforests’ app. Answer these questions using full sentences.

1. What is the name of the process where plants convert sunlight into energy?
2. Why do rainforest plants have to compete with each other to get enough light?
3. What plants use anchor-like hooks to climb from the ground to the canopy?
4. What plant is known for killing trees because it wraps itself around the trunk?
5. What is unusual about epiphytes?
6. What plant lives on the roots and stems of other plants and has no visible leaves, roots or stems of its own?
7. Name two rainforest plants that have been used for medicine.
8. How do acacia plants and ants help each other?

Extension

Use the internet to research other rainforest plants from around the world. Write the name and information about each one.
