

Feed the Birds

Make a feeding ball to feed the birds in the wintertime.

You will need:

- * Leftover dry kitchen scraps, such as oats, raisins, sultanas, bread cake, peanuts or grated cheese
- * Lard or suet (around half the amount of the dry mixture)
- * Saucepan
- * Wooden spoon
- * String

1 Mix your dry ingredients in a bowl.

2 Melt some lard or suet in a saucepan, pour it over the dry mixture and stir it together.

3 When the mixture has cooled, shape it into balls around long pieces of string.

4 Put the balls in the fridge to set for several hours or leave them overnight.

5 Knot the bottom end of the strings, then hang the balls on the branches of a tree.
