

P7 Maths Facts (week beginning: March 1st)

Days in each Month*

30 days has September,
April, June and November.
All the rest have 31,
excepting February alone
which has but 28 days clear
and 29 in each leap year.

* it would be helpful to learn the rhyme off by heart but it is not essential as they simply need to know how many days there are in each month for the test
