

Primary Practice Questions

Corbettmaths

Quadrilaterals

Tips

- Read each question carefully
- Attempt every question.
- Check your answers seem right.
- Always show your workings

Recap

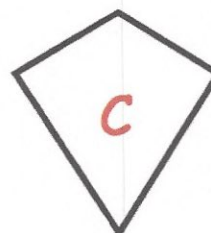

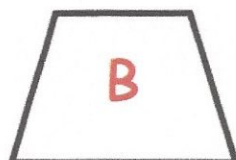

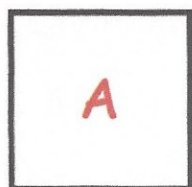

Remember

- There are daily questions found at
www.corbettmaths.com/5-a-day/primary

1. Here are the names of five quadrilaterals

Square Rhombus Rectangle Kite Trapezium

Three of them are drawn below

What is the name of Shape A?

Square

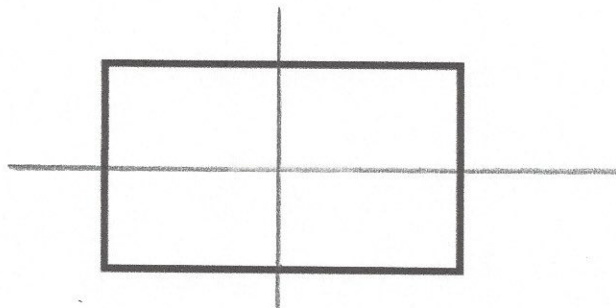

What is the name of Shape B?

Trapezium

What is the name of Shape C?

kite

2. Here is a quadrilateral

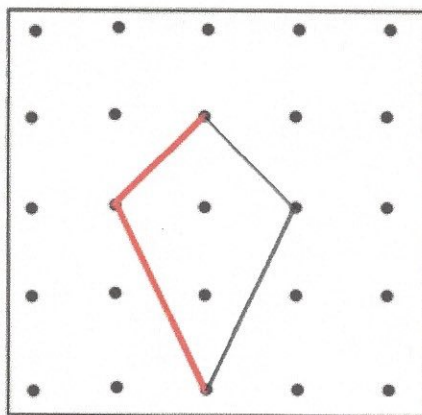

Write down the name of this quadrilateral

Rectangle

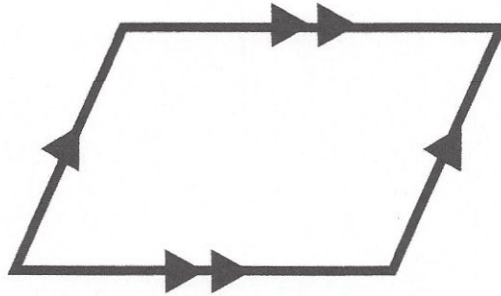

Draw any lines of symmetry on the quadrilateral

-
3. Alisha is drawing a kite on the grid

Finish drawing the kite

4. Here is a quadrilateral.
It has two pairs of parallel sides.

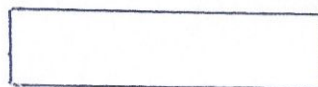

Write down the name of this quadrilateral

Parallelogram

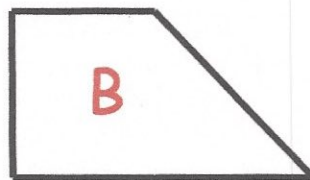

How many lines of symmetry does the parallelogram have?

0

Draw a quadrilateral with two lines of symmetry

5. Here are two quadrilaterals

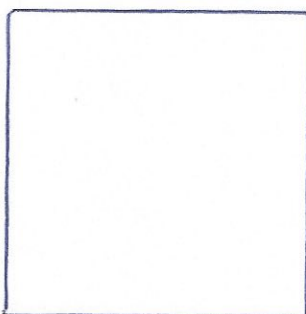

What is the name of Shape A?

Rhombus

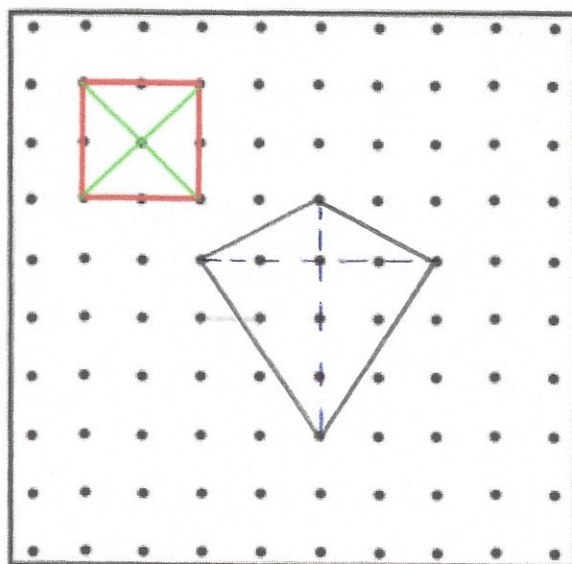

What is the name of Shape B?

Trapezium

Draw a square with sides of length 4cm

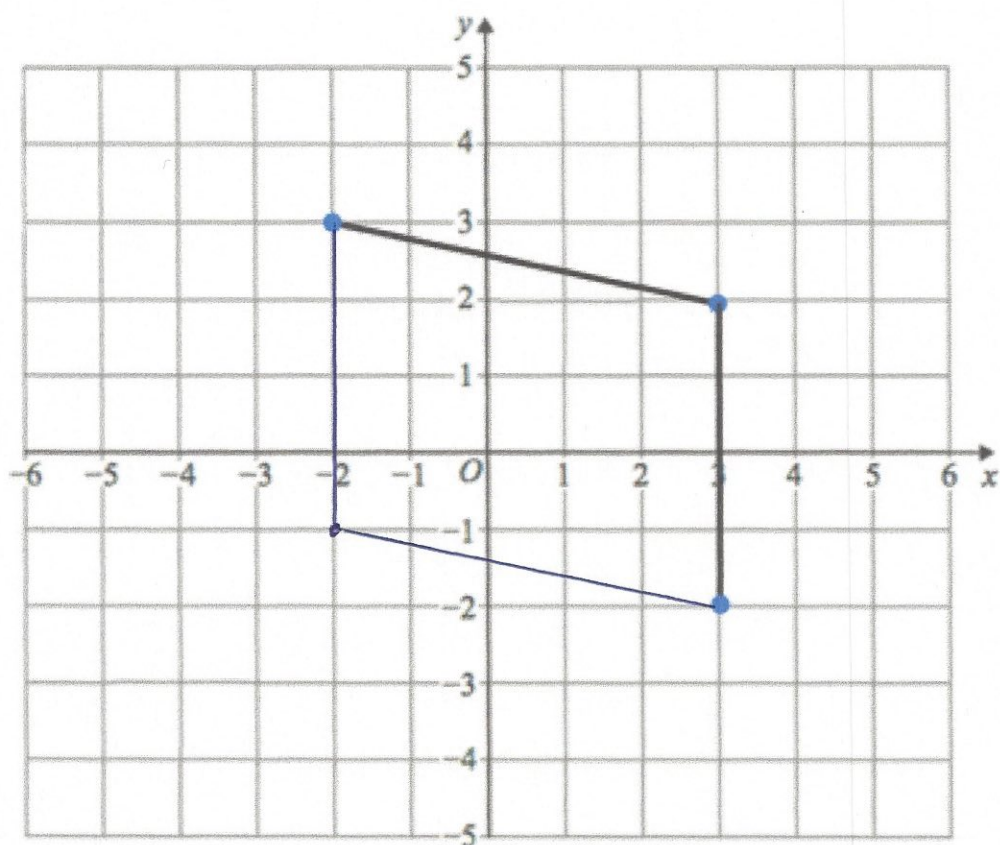

6. The diagonals of a square cross at right angles.

kite
Rhombus

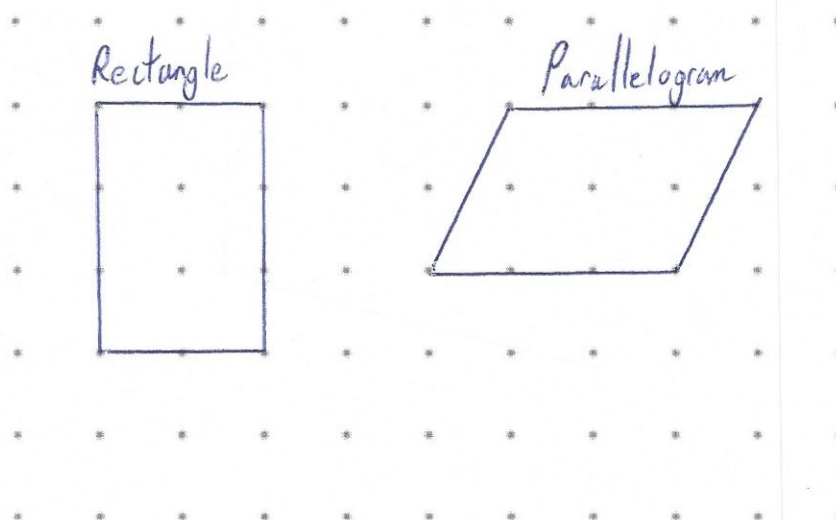

On the grid, draw a different type of quadrilateral with diagonals that cross at right angles.

7. Two sides of a parallelogram have been drawn

Complete the parallelogram

8.

Draw two quadrilaterals with diagonals that **do not** cross at right angles

9. Here is a list of quadrilaterals.

kite rectangle rhombus square parallelogram

For each of the following descriptions, choose the correct name from the list

- (a) All four sides are the same length.
All four angles are equal.

Square

- (b) Two pairs parallel sides.
Opposite angles are equal.
No lines of symmetry.

Parallelogram

- (c) All four sides are the same length.
There are no right angles.

Rhombus
