

To draw shapes, given the coordinates of the vertices.

Coordinates

Write the coordinates of the vertices (corners) of each shape:

Draw coordinate grids, labelled from 0 to 6 on each axis.

Plot these points and join them to make a shape:

- 5 (2, 5), (4, 5), (4, 1), (2, 1)
- 6 (1, 1), (0, 4), (6, 4), (5, 1)
- 7 (0, 3), (3, 6), (6, 3), (3, 0)
- 8 (1, 3), (4, 6), (6, 3), (4, 0)
- 9 (1, 3), (1, 5), (5, 3), (5, 1)
- 10 (1, 1), (5, 1), (5, 4), (3, 6), (1, 4)
