

Week 5 Ladybirds

Welcome to week 5, boys and girls! We loved seeing all of last week's fabulous work. Well done! This week we will continue our work on data collection. We will have another look at pictograms, tally charts, tables and block diagrams.

Things to think about

Tally charts: Remind your child to cross the tally when they reach a multiple of five. If your child counts each tally individually you could remind them that they can count in fives as this is quicker.

Organising data: Remind your child that data needs to be placed in specific parts of the block diagram (i.e. "salt" needs to be placed on the "salt" part in the following questions).

Monday 1st February	Watch online lesson 4 on tallying (revision) and making a bar graph. You can use the tally chart on the video or the pictures of condiments on Monday's worksheet to help you. You can remind your child that each bar stands for 2. Monday worksheet bar charts (condiments).
Tuesday 2nd February	Tuesday's worksheet - Pet bar chart
Wednesday 3rd February	Count in tens to 100 and back. Watch online Lesson 5 interpreting pictograms and bar charts. In Wednesday's Planets worksheet each  stands for 10 Write down how many people want to visit each planet. Look at the block diagram then read and answer the questions.
Thursday 4th February	Thursday's worksheet Have a look at the bar graph. Note that each block stands for 5. Ask your child to write four questions about the bar graph. Remember question marks.
Friday 29th January	1. Spelling and number test, again mixing up the sums. Fun Friday! Let's play Top Mark games!!! Helicopter Rescue https://www.topmarks.co.uk/learning-to-count/helicopter-rescue Funky Mummy (lots of levels to choose from) https://www.ictgames.com/mobilePage/funkyMummy/index.html
