

I've got a great verse to help remember how many days there are in each month:

30 days have September,
April, June and November.

All the rest have 31.

Except for February that is all alone,
Which has 28 days clear and 29 each leap year.

1. How many months normally have 28 days?

2. How many months have 30 days?

3. How many months have 31 days?

4. Which months have more days than June?

5. Name two consecutive winter months that have 31 days.

Now, can you help me to remember how many days each of these months has?

1. December has days.
2. March has days.
3. June has days.
4. October has days.
5. April has days.
6. August has days.
7. September has days.
8. January has days.
9. May has days.
10. February normally has days.
11. July has days.
12. November has days.

Can you find the total number of days for the following:

1. Altogether April, May and June have days.
2. Altogether January, February and March in a leap year have days.
3. Altogether October, November and December have days.
4. Altogether August, September and October have days.
5. Altogether May, June and July have days.
6. Altogether February, March and April in a normal year have days.
7. Altogether from June to September inclusive there are days.

Answers:

Page 1

1. 1 month normally has 28 days.
2. 4 months have 30 days.
3. 7 months have 31 days.
4. January, March, May, July, August, October and December have more days than June.
5. The two consecutive winter months with 31 days are December and January.

Page 2

1. December has 31 days.
2. March has 31 days.
3. June has 30 days.
4. October has 31 days.
5. April has 30 days.
6. August has 31 days.
7. September has 30 days.
8. January has 31 days.
9. May has 31 days.
10. February normally has 28 days.
11. July has 31 days.
12. November has 30 days.
