

P7 Maths Facts (week beginning: January 10th)

Types of Angles

acute angle = less than 90°

right angle = 90°

obtuse angle = more than 90° but less than 180°

straight line = 180°

reflex angle = more than 180° but less than 360°

It would be also be useful to watch this short Corbettmaths Primary video so your child can see these different angles visually:
