

The Rainforest Animals

👉 Black Panther 👈

Find out loads of facts about the
blackpanther

The Black Panther is a very stealthy animal
they can climb, run really quickly and hunt,
they're very smart animals too

The bird of the Rainforest

Birds have very good eyesight (and they have to have good eyesight) because they hunt for animals that are in the under storey and have 1,300 species of them and there's only 3,800 species found

👉 Frogs 👈

They're up to 1,400 frog species of
Frogs... most are very cute animals
.... except for the poison dart frogs.
They can kill up to 12 adults in 1
touch

👉 BABOON 👉

Baboons are the world's largest monkeys, according to National Geographic.

From head to bottom, baboons grow to 20 to 34 inches (60 to 86 centimeters) and their tails add an additional 16 to 23 inches (41 to 58 cm) to their length. They weigh about as much as a human child — 33 to 82 lbs.

Margay

The margay (*Leopardus wiedii*) is a small wild cat native to Central and South America. A solitary and nocturnal cat, it lives mainly in primary evergreen and deciduous forest. Until the 1990s, margays were hunted illegally for the wildlife trade, which resulted in a large population decrease.
