Advice services	Belfast City Council supports generalist advice centres across Belfast to provide free, confidential and independent advice.	www.belfastcity.gov.uk/advice-providers

10 Top ten tips to save energy

Here are some top tips to help you save energy from National Energy Action:

You can save around **£55** by just remembering to turn off electric appliances and not leaving them on standby e.g. TV, laptops, mobile phones

Save an average of **£65** a year on electricity by drying clothes on a clothesline, instead of a tumble dryer

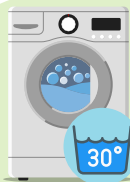

Room thermostats allow you to set the temperature your home heats up to and maintains. Turning it down by just one degree could save you around **£80-£100** per year

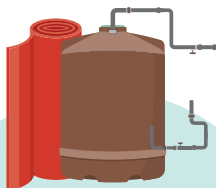

Spending one minute less in the shower every day will save up to **£9** per person on household energy bills each year.

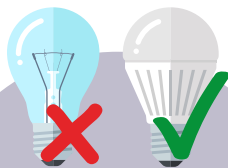

Only boil the water you need in your kettle. This can save you **£12** per year.

Washing clothes at 30°C and one less cycle per week can save around **£15** a year on energy

Effective insulation is important. Increasing your hot water cylinder insulation to 80mm could save you **£45** a year and increasing loft insulation to 270mm could save you **£35 - £300** per year

Switch off lights when not in use. This could save your household **£20** a year. Switching to LED bulbs could save you between **£4 - £13** per bulb per year

Only run the dishwasher when full. One less run per week could save **£15** per year

Draughtproofing windows and doors can save around **£40** per year. Chimney draught excluders can save an additional **£20**

Sources: Information sourced from Energy Saving Trust - Northern Ireland savings are for a typical three-bedroom, semi-detached home in Northern Ireland using an oil price of 9.2p/kWh and an electricity price of 30.9p/kWh (as of July 2022).
