

Covid Action Plan

September 2021

We are still awaiting official advice from DENI with regards to action to be taken when a child in school is positive for COVID.

At present our action plan is as follows –

- If a child has a **positive result** – inform school & keep child at home for 10 days.
- If the child has been in contact with the class within 48 hours then the whole class and teacher must leave school immediately, remain at home and organise a PCR test, the result of which must be shared with school. Lateral Flow tests are not acceptable in this instance.
- Teacher & children with negative tests may then return to school.
